Headers and footers are essential for professional documents. They provide consistent branding and navigation information across pages. Best practices: - Keep headers simple and consistent - Include document title or company name - Add page numbers in footers - Include date or document metadata - Use subtle colors or lines to separate from content

Example 5: Page Numbering Techniques

Page Numbering Techniques: 1. Simple Page Numbers: - Bottom center: 'Page X'   - Bottom right: 'X' 2. Page X of Y Format: - Shows total pages: 'Page 1 of 10'   - Useful for long documents 3. Custom Formats: - Chapter-Page: '2-5' (Chapter 2, Page 5)   - Roman numerals for front matter: 'i, ii, iii'   - Numbers for main content: '1, 2, 3' 4. Implementation Tips: - Track page count as you add pages   - Use helper functions for consistency   - Consider different numbering for different sections   - Place numbers consistently (footer or header) Look at the footer of this page for an example!
