UTF-8 and Special Characters

Common Special Characters:

Quotes: "Hello" 'World' guillemets

Currency: $ (euro) (pound) (yen)

Math: +/- x / approx not-equal less-equal greater-equal

Symbols: (c) (R) (TM) section paragraph

Arrows: left right up down double-arrow

Bullets: dot circle square diamond

Multilingual Support:

English: Hello World

Spanish: Hola Mundo (accented characters)

French: Bonjour le monde (accented characters)

German: Hallo Welt (umlaut characters)

Portuguese: Ola Mundo (accented characters)

Working with Escaped Characters

Characters that need special handling:

Parentheses: (like this) and [brackets]

File paths: C:\Users\Documents

Single quotes: 'text' and "double quotes"

UTF-8 Encoding Tips:

1. Always use fonts that support Unicode (like Arial Unicode MS)

2. Ensure your Go source files are saved as UTF-8

3. Test special characters before deploying

4. Some fonts may not support all Unicode characters

5. Consider fallback fonts for missing glyphs
